

PLEASE JOIN US FOR A ONE-DAY FIRE ECOLOGY FIELD TOUR!

# Fire Effects in the Lodge Fire

May 7, 2015

9:30 am - 3 pm

UC's Angelo Reserve near Laytonville, CA

Join us for a fire ecology hike at UC's Angelo Reserve! We will enjoy a **moderately strenuous ~2.5 mile hike** that will take us through mixed hardwoods and chaparral to the boundary of the 2014 Lodge Fire, then through a stand of mature Douglas-fir forest that burned in the fire. We will hear about the progression and management of the fire, discuss fire severity and effects, and enjoy lunch by a late-1800s homestead on the banks of the beautiful South Fork Eel River.

## Hosts include:

- Peter Steel, Angelo Reserve Manager
- Tim Jones, Fire Management Officer, BLM - Arcata
- Lenya Quinn-Davidson and Yana Valachovic, University of CA Cooperative Extension/CA Fire Science Consortium
- Eamon Engber, Fire Ecologist, National Park Service

We will be there rain or shine!

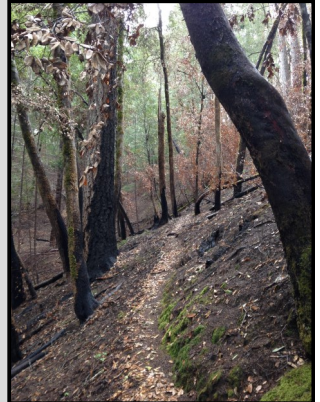

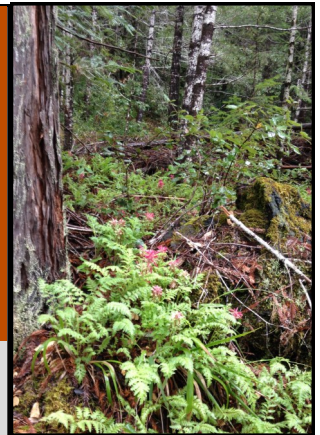

## This event is free!

To sign up, email Lenya at [lquinndavidson@ucanr.edu](mailto:lquinndavidson@ucanr.edu) before May 4, 2015. Space is limited, so sign up soon!

Bring plenty of water, snacks, and lunch.

This field tour involves a moderately strenuous hike. Please wear sturdy boots.
